MEMORANDUM OF DISTRIBUTION:

SUBJECT: Interim Report on the ABM Study

1. The enclosed Interim Report on the ABM Study (of the effectiveness of ABM collection systems) deals with the Network. The Network, which represents one of the two major input phases of the Study, structures the total informational needs on the Soviet ABM system and includes the associated relative values and accuracies.

2. The Preface to the Report notes the status of the other phases of the Study, but this Report does not deal with them nor does it deal with methodological alternatives which would affect exploitation of the Network. Such considerations will be reported on at a later date.

25X1A

  
Chairman  
ABM Study
